SPRINT VIDEOCONFERENCINGSM

MEET “FACE-TO-FACE” WITH KEY CONTACTS AROUND THE WORLD

Videoconferencing solutions from Sprint can cover you every step of the way—from top-of-the-line equipment to high-quality network transport to comprehensive service bureau support. All of these services are designed with one goal in mind: to deliver a user-friendly solution that will improve your communications and enhance your productivity.

Features

Network transport

Our 100 percent digital, fiber-optic network is central to high-quality videoconferencing.

- ▶ Enjoy consistent, high-quality network performance at a reasonable cost with Sprint switched digital services or IP-based conferencing solutions
- ▶ Rely on prompt diagnosis of any difficulties you may encounter during a conference, thanks to our centralized operations support for SDS, ISDN, IP and the Sprint Videoconferencing Service Bureau

Equipment solutions

Get everything you need to get your site conference-ready:

- ▶ State-of-the-art Polycom® videoconferencing systems and desktop appliances—some of the most affordable, easy-to-use equipment available today
- ▶ Video monitors, document cameras, carts and network interfaces to complete the picture

Service Bureau

Expand your reach via the Sprint Videoconferencing Service Bureau. Our experience and expertise are your assurance of high-quality conferencing.

- ▶ Connect customers, partners and suppliers located at numerous sites around the world—even if they're using different equipment or networks—with Sprint bridging, conversion and gateway services
- ▶ Include people who don't have video equipment on site; Sprint's vast domestic and international network of more than 500 public rooms, including 150 Kinko's locations, helps you bring more people together comfortably and affordably
- ▶ Take advantage of dial-out service for ready-to-start conferences; continuous presence feature and T.120 support

Reservations

When you need solutions from our Service Bureau or information about and access to public rooms, Sprint is there for you 24/7. Talk to one of our reservation coordinators to plan your conference or go online for our Web-based reservation service. Your online option helps you manage the scheduling of your company sites, research and reserve public rooms, easily check and change arrangements, track and manage costs, and more.

Sprint StreamingSM

Share a live or pre-recorded video conference or event with a virtually unlimited audience via the Internet. Provide access to your video content around the world, 24/7—easily and cost effectively.

Applications

- ▶ Team meetings
- ▶ Sales meetings
- ▶ Training, seminars, testing
- ▶ Distance learning
- ▶ Sales presentations
- ▶ Creative reviews
- ▶ Legal depositions
- ▶ Telemedicine
- ▶ Telecommuting
- ▶ Product demonstrations
- ▶ Crisis management
- ▶ Press announcements
- ▶ Recruiting
- ▶ Shareholder meetings

Business advantages

Improve collaboration

Sprint Videoconferencing can improve teamwork, enhance information exchange and bring people together, wherever they may be located.

Save travel time

With Sprint Videoconferencing, you can bring together key contacts from around the world for a virtual “face-to-face” meeting. That means you can avoid the downtime and travel expenses associated with traditional meetings.

Avoid hassles

Instead of working with one vendor for equipment, another for network transport and yet another for service and support, make Sprint your one-stop source for the products

and services you need. Instead of worrying about technology, you can focus on making your meeting a success.

Expand your audience

Sprint Streaming allows you to take a live or recorded conference to the Internet for access by the broadest possible audience. Plus, viewers can access an archived stream at their convenience.

Reliability

Sprint is a pioneer of business-to-business collaboration services, so you can rely on our experience and technical expertise to help you ensure that your videoconference is a professional event.

More Sprint collaboration tools

Sprint Videoconferencing is just one of a comprehensive selection of collaborative tools designed to streamline and enhance the way companies communicate. The Sprint Internet Collaboration CenterSM (www.sprint.com/icc) provides information about and access to our premier collaboration solutions, including audio conferencing, videoconferencing, Web-based data collaboration and streaming.

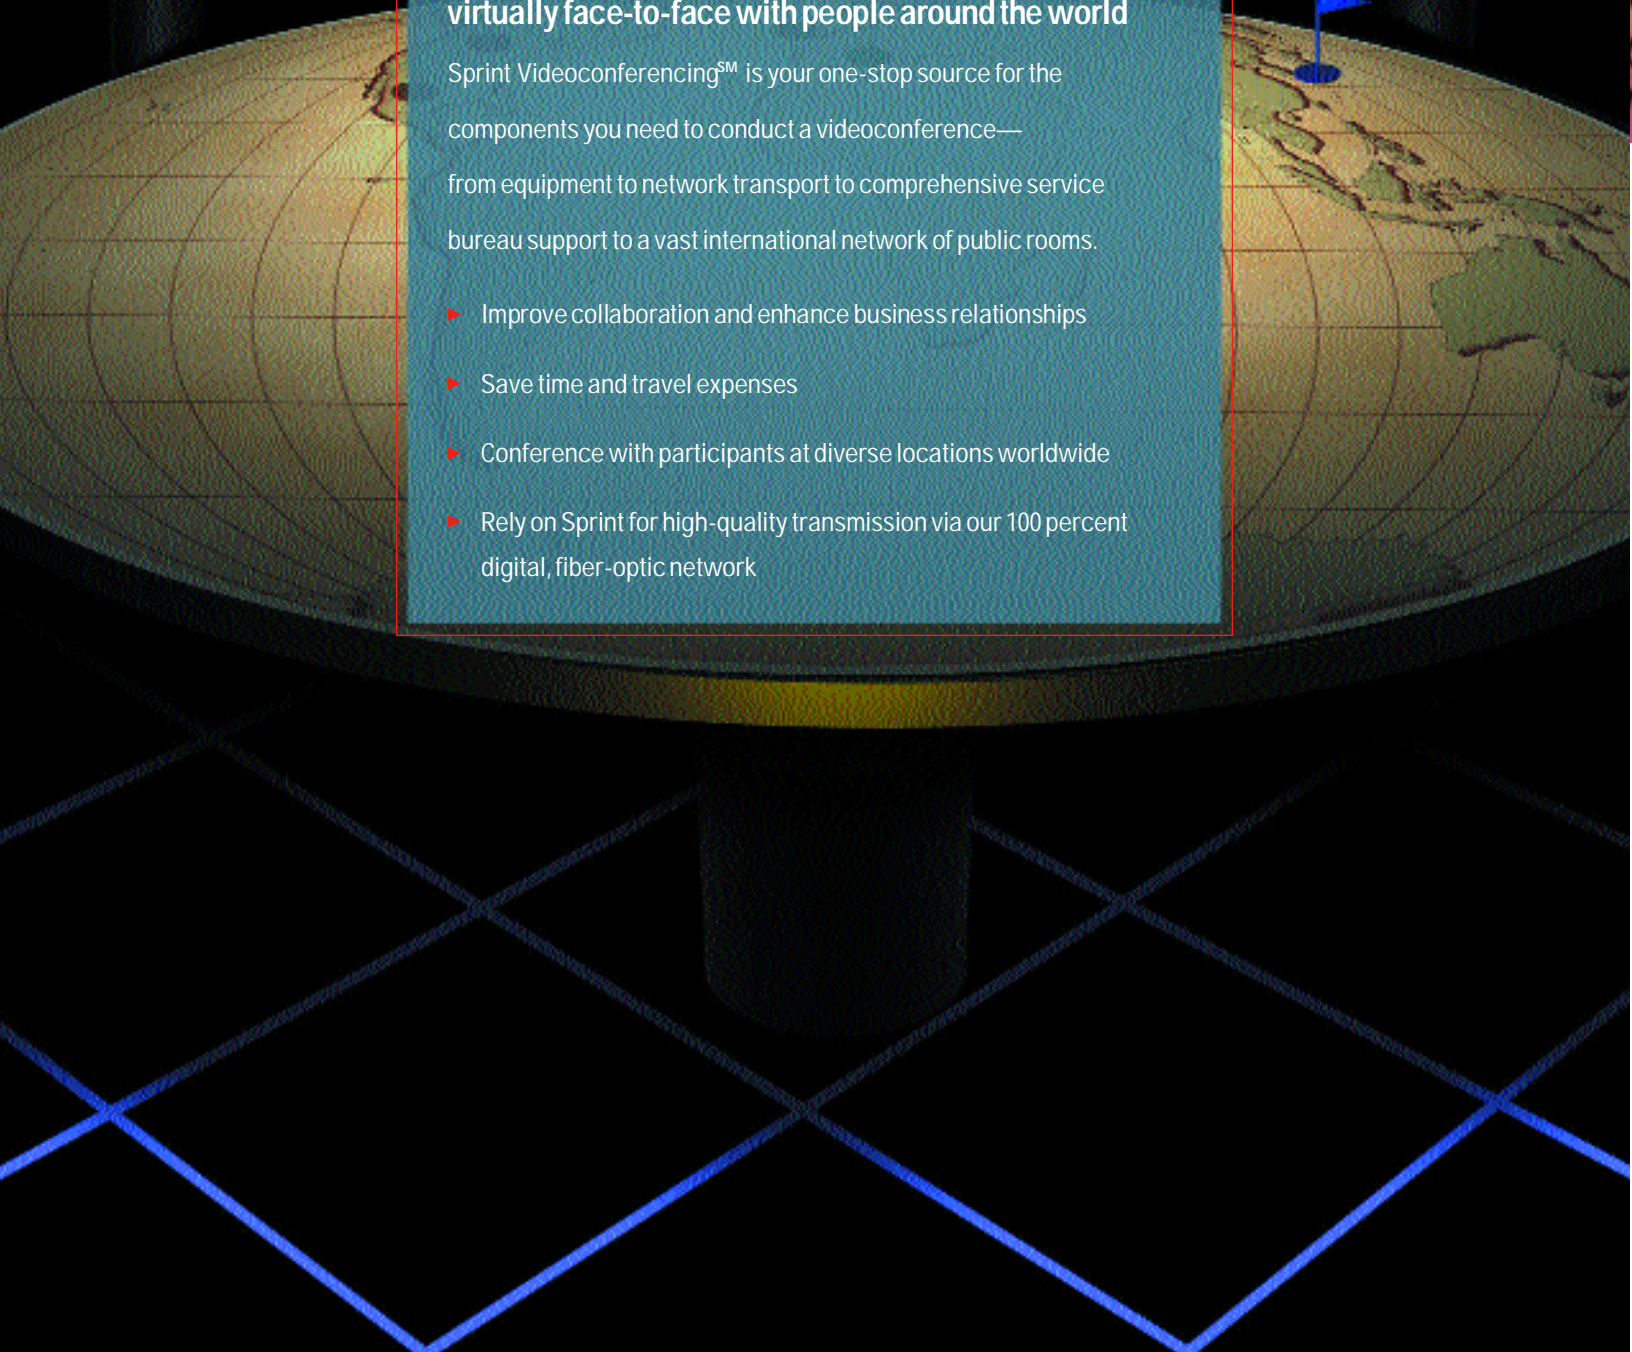

Expand your reach
with our Service
Bureau support and
Sprint Streaming.

Videoconferencing services from Sprint bring you virtually face-to-face with people around the world

Sprint VideoconferencingSM is your one-stop source for the components you need to conduct a videoconference— from equipment to network transport to comprehensive service bureau support to a vast international network of public rooms.

- ▶ Improve collaboration and enhance business relationships
- ▶ Save time and travel expenses
- ▶ Conference with participants at diverse locations worldwide
- ▶ Rely on Sprint for high-quality transmission via our 100 percent digital, fiber-optic network
