

The Global Calling Card Solution  
For Your Cost-conscious Company

Sprint FÖNCARD<sup>SM</sup> makes communicating easier for your employees who are on the go, and can save money for your company, too! **Here's how your business can use it:**

**Maximize efficiency in your communications.** Keep in touch with the main office, clients and staff. Eliminate the need for correct change by allowing callers to charge their calls to a discounted business account. And, with FÖNCARD there is no longer a lengthy card number to remember—your calling card number is your business or home phone number with a customer-selected four-digit Personal Identification Number (PIN).

**Minimize travel calling expenses.** Reduce costly hotel calling surcharges and avoid fluctuating currency exchange rates. Track calling activity by individual employee, department or division and prevent fraudulent use with Accounting Codes.

**Save money with volume discounts.** Combine your employees' FÖNCARD usage with other Sprint communications services to maximize available volume discounts.

**Boost productivity.** Use FÖNCARD Enhanced Features to maximize your employees' ability to communicate, both in the office and away.

**Manage FÖNCARD costs with detailed call reports.** The Sprint bill itemizes all calls and charges. Summary reports provide detailed information about your calling activity to help effectively manage your telecommunications costs.

**Stay in touch and conduct business worldwide.**

Call more than 300 direct-dial international locations from the United States. When traveling outside the United States, use your FÖNCARD to call home—or anywhere else in the world.

## Sprint FÖNCARD offers these advantages for your business:

- » Maximized efficiency in communications
- » Minimized travel calling expenses
- » Money-saving volume discounts
- » Boost in productivity
- » Cost management with detailed call reports

Plus, Sprint FÖNCARD lets you stay in touch and conduct business worldwide.

## Maximize Efficiency And Minimize Expenses In Daily Business Communications

---

### Basic Features

- » Call anywhere in the United States and to more than 300 direct-dial international locations.
- » Use the FÖNCARD from any telephone, even rotary-dial phones.
- » When traveling overseas, call back to the United States, in-country and country-to-country.

### Enhanced Productivity Features

- » FÖNUMBER<sup>SM</sup> Use your 10-digit office or home phone number, plus your own four-digit Personal Identification Number (PIN) as your card number.
- » Porting existing authorization numbers. Switching carriers no longer means changing card numbers. Sprint can port existing 14-digit authorization codes from other carriers. Some restrictions may apply.

### Time-saving Features

- » Make multiple calls by pressing # at the end of your call. Then dial the next area code and phone number.
- » Correct dialing mistakes by pressing the star button on your telephone and redialing your FÖNCARD number.

### Cost Management Tools

- » Call Detail reports provide usage and calling patterns.
- » Accounting Codes categorize usage by employee, client, project, cost center, department or division.
- » Access to FÖNCARD Enhanced Features can be restricted.
- » Lost or stolen FÖNCARDS are cancelled and replaced free of charge.
- » Calling charges are billed directly to your company's FÖNCARD account and charges appear on your Sprint long distance bill.

### Security Features

- » Sprint's Fraud Abuse Prevention System tracks and monitors all calls.
- » With FÖNUMBER<sup>SM</sup>, gain added security by picking your own number to remember — without having to carry or display your card when dialing at pay phones or other busy locations.
- » Printed card lists help track FÖNCARDS and their use.
