

THE FACTS ABOUT

SPRINT COLLABORATIVE SOLUTIONS

Sprint provides a full range of interactive, collaborative tools to help your business improve communication, productivity and profitability:

- ▶ Reservationless and attended audio conferencing options
- ▶ Full-service videoconferencing
- ▶ Internet-based interactive data conferencing
- ▶ Streaming of video or audio content over the Internet
- ▶ ...all showcased at the Sprint Internet Collaboration CenterSM

Sprint collaborative solutions fit the bill for a broad range of everyday business needs: team meetings, sales meetings, presentations, creative reviews, product demonstrations, seminars and training, crisis communications, press announcements, recruiting, shareholder meetings and much more.

Choose the audio conferencing option that meets your needs

- ▶ Sprint Personal ConferencingSM for reservationless meetings — up to 30 participants — at your convenience, without extensive planning, complicated arrangements or administrative hassles
- ▶ Sprint Attended ConferencingSM for full-service, multi-featured audio conferencing with professional management for specialized conference needs.

Sprint Personal ConferencingSM — for your everyday meetings

Permanent toll and toll-free dial-in numbers and access codes make conferencing especially convenient. Plus, a range of features provides great flexibility:

- ▶ Participants can join the conference by dialing in — or the chairperson can dial out to participants to launch a spontaneous call or add participants to a conference underway
- ▶ Individual line mute, lecture mode, roll call, participant count and conference security features can all be accessed via the telephone keypad
- ▶ The chairperson can also transfer control of the conference to a participant
- ▶ Count the number of participants via a series of tones or via a voice roll call feature

Sprint Attended ConferencingSM — for larger conferences and specialized needs

Sprint Attended Conferencing which requires reservations — allows you to conference with hundreds of participants and provides for coordinator assistance to greet and screen participants and facilitate other features, such as Q&A. Features include:

- ▶ Participants lists and advance notification via fax or mail, roll call and announcements, security features, subconferencing, automated polling, lecture mode/listen only
- ▶ Accounting codes for cost tracking, conference recording, conference transcriptions, digital audio replay, and pre-conference faxing of documents are available

Sprint offers some of the most robust collaborative services in the industry, continually adding the latest innovations and features.
