1. Application of Service (Continued)

Sprint Direct 800 and Sprint Ultra Toll Free are inward-calling only services which allow calls from normal shared-use facilities in selected service areas to be terminated via dedicated access lines at the subscriber's location without charge to the caller. Charges to the subscriber are distance and time sensitive. Usage for Sprint Direct 800 and Sprint Ultra Toll Free will be calculated to the next higher 6 seconds. Ultra Toll Free and Direct 800 are subject to a thirty second Minimum Average Time Requirement (MATR).

Sprint's FONLINE Service is an inward calling service designed for small to medium businesses which allows calls from normal shared-use facilities in selected service areas to be terminated via local exchange lines at the subscriber's location without charge to the caller. FONLINE uses standard telephone lines, so no special lines or equipment are required by the subscriber. FONLINE utilizes Sprint's 100 percent digital, fiber optic network, as do all other toll free products. FONLINE differs from Direct 800 and Ultra Toll Free in the respect that it has no minimum usage requirement, and has only a low monthly service charge, plus usage. Direct 800 and Ultra Toll Free are geared towards medium to large businesses and are provided via dedicated access lines, as opposed to local exchange lines. Charges to the FONLINE subscriber are distance and time sensitive. FONLINE calls are subject to an eighteen second minimum time requirement per call.

Sprint's Canadian Toll Free Service is a inward calling FONLINE service available to Canadian subscribers which allows calls from the U.S. Mainland, Hawaii, Puerto Rico, the U.S. Virgin Islands, Guam and CNMI. Sprint's Canadian Toll Free Service is subject to all the terms and regulations applicable to Sprint's domestic FONLINE service. Calls are billed in six second increments and are subject to an 18 second minimum time requirement per call.

Residential Toll Free* Service is a flat-rated, inward calling service designed for residential customers which allows calls to be terminated over the subscriber's residential phone line. The subscriber does not need to change phone numbers or add additional lines. Residential Toll Free Service rates are based on usage charges and a monthly service fee. There is no installation charge for Residential Toll Free Service.

Complementary Toll Free* service provides residential customers a seamless inbound service for intrastate, interstate and international calling for customers of participating local exchange carriers' toll free service. Customers must subscribe to the toll free service of the local exchange carrier which will be the Resp Org as defined herein. Complementary Toll Free service has flat-rated usage charges and a monthly recurring charge. No installation charge applies. No term plans will be offered with the Complementary Toll Free service.

* Effective February 1, 1995, this service is no longer available to new subscribers.

** Except as stated in Section 41.1 herein, this service is no longer available to new subscribers effective March 1, 1995.

Total Solution WATS is an outbound calling service available in Hawaii designed to meet the communications needs of small- to medium-sized business customers which originate calls via dedicated facilities between the subscriber's premises and Sprint's terminal in the originating city and terminate calls via normal shared use facilities. Charges are time of day sensitive. Total Solution WATS service offerings include interstate, intrastate and international outbound services.

If, in any given billing month, the above condition is not met, the customer will default to Sprint Dial "1" WATS Transport or Ultra WATS Transport (depending on whether the customer utilizes switched or dedicated access, respectively) with no additional discounts.

Dial "1" WATS ADVANTAGE** (D1W ADVANTAGE) is a switched access service offering which features Sprint's FONCARD ADVANTAGE**, a travel card exclusively for business customer subscribers of Dial "1" WATS ADVANTAGE**. D1W ADVANTAGE** benefits single as well as multiple location Sprint customers by awarding retroactive volume discounts based on total D1W ADVANTAGE** and FONCARD ADVANTAGE** domestic (interstate and intrastate) and international gross usage from all customer locations. All Dial "1" WATS ADVANTAGE** and FONCARD ADVANTAGE** calls have an initial billing increment of 30 seconds with additional rate increments of 6 seconds with partial increments being rounded to the next highest six second increment. 41. SPRINT WATS AND TOLL FREE SERVICES (Continued)

1. Application of Service (Continued)

All customer locations enrolled for Sprint's Dial "1" WATS ADVANTAGE** service must be identified as either "associated" or "non-associated" locations. The subscriber to the Dial "1" WATS ADVANTAGE** Service must serve as the point of contact for all service and billing issues for "non-associated" locations enrolled in the Dial "1" WATS ADVANTAGE** Service. Billing for such locations will be made directly to the subscriber. Liability for charges incurred by "non-associated" locations will be the sole responsibility of the subscriber.

"Associated" locations may be billed directly by Sprint, at the discretion of the customer. In such cases, both the Dial "1" WATS ADVANTAGE** service subscriber and the customer at each individual location will be separately and jointly responsible for any charges incurred at that location.

Except as noted, effective March 1, 1995, Sprint will no longer be offering its Dial "1" WATS, Ultra WATS or Dial "1" WATS ADVANTAGE services to new subscribers. Existing Dial "1" WATS, Ultra WATS and Dial "1" WATS Advantage subscribers, however, may continue to add these services to new locations.

If, in any given billing month, the above condition is not met, the customer will default to Sprint Dial "1" WATS Transport rates or Ultra WATS Transport rates (for switched or dedicated access, respectively) with no additional discounts.

Dial "1" WATS Transport* calls are originated in equal access areas, via Feature Group D and are terminated via normal shared use facilities. Charges are time and distance sensitive, but do not vary with distance within bands.

Ultra WATS Transport* calls are originated via dedicated facilities between the subscriber's premises and Sprint's terminal in the originating city and are terminated via normal shared use facilities. Charges are distance and time sensitive.

Sprint Wholesale Switched Outbound calls are originated via WATS access lines and are terminated via normal shared use facilities. Charges are time and LATA sensitive.

Sprint Wholesale Dedicated Outbound calls are originated via dedicated facilities between the subscriber's premises and Sprint's terminal in the originating city and are terminating via normal shared use facilities. Charges are LATA and time sensitive.

12. Successive NPA Information

Due to a NPA split or NPA introduction, certain NPAs may not be listed in the Rate Steps tables found in Sections 41.5.1 through 41.11. NPAs not found in Sections 41.5.1 through 41.5.11 are listed in this section. In order to determine which rate steps apply to a new NPA or a split NPA: 1) locate the new NPA in the middle column of the table below, 2) note the NPA number in last column of the table below from Sections 41.5.1 through 41.5.11, and (3) in the applicable section (Sections 41.5.1 through 41.5.11) locate the original NPA. The rate steps for the original NPA will apply for the new NPA . For example, the rate step information for the new NPA 479 under Arkansas below will match the original NPA 501 rate steps in the table found in Section 41.5.11, Page 133.8 .

14. Mexico Zones and U.S. Rate Areas For International Toll-Free Service (ITFS) from Mexico

The rates for ITFS from Mexico are based on the Originating Zone in Mexico. Originating Zones are geographic regions in Mexico from which ITFS calls may be originated. There are four such zones in Mexico. Calls can terminate to the U.S. Mainland, Hawaii, Puerto Rico and the U.S. Virgin Islands.

To determine the appropriate rate for an ITFS call from Mexico, locate the originating point in Section 41.5.14.1 following and note the Originating Zone number of that location. The Mexican Zone number is used to determine the appropriate per minute rate for calls.
