

INMARSAT SERVICE¹

Outbound Switched Access Service

Sprint INMARSAT service is an outbound switched access service furnished using satellite facilities from stations in the U.S. Mainland, Hawaii, Puerto Rico or the U.S. Virgin Islands to oil rigs and ships in the following international ocean regions/areas: Atlantic Ocean Region (EAST), Atlantic Ocean Region (WEST), Indian Ocean Region and the Pacific Ocean Region.

The following types of calling capabilities are available using Sprint INMARSAT service:

- INMARSAT A

Voice, telex, facsimile and data transmission through an analog signal. All rates for this service type to the Atlantic, Indian and Pacific Ocean Regions are located under each Sprint service international product.

- INMARSAT Global Access

The ability to call any number covered under Country Codes 871, 872, 873 or 874 by dialing Country Code 870. The rates associated with INMARSAT A service will apply.

- INMARSAT B

Voice, telex, facsimile and data transmission through a digital signal (T Digit: 3);

- INMARSAT M

Digitally compressed voice and slow-speed data and facsimile telecommunications through a digital signal (T Digit: 6);

- INMARSAT Mini-M

Digitally compressed voice and slow-speed data and facsimile telecommunications through a digital signal which can terminate only to mobile earth stations (T Dual Digit: 76); and

- INMARSAT Aeronautical

Voice transmission through a digital signal while in flight on an airplane (T Digit: 5).

With the exception of INMARSAT A and INMARSAT Global Access, an additional dialing transmission digit (T digit) is required after dialing the international country code for each INMARSAT service.

The INMARSAT service utilized will be billed utilizing the same billing increments as the underlying service with any per call minimums applying.

Issued: July 31, 2001

Effective: August 1, 2001

¹ Formerly found in Sprint Tariff F.C.C. No. 1, Sections 4.4.31 and 5.6.25.
